August, 20, 2021
We had a wonderful start to the year! I am so glad to have all of your children in my class.

We are starting full steam ahead in math with learning our multiplication and division facts. We will be starting with 5's then 2's. There will be homework each night to practice multiplying by 5. If there is ever a time that math takes more than 15 minutes, just write a note in their planner.

Chipotle Night is Monday evening. Come support our school and skip making dinner!

Your student will need to do their homework each night and have you initial their planner.

The week of Aug 23, we have Library for specials.

This is a fantastic group of kiddos and I can’t wait to see what they will do this year!

Water bottles and snacks need to come to school each day.
