## Who We Are:

LPR Construction Co. (LPR) continues to be an industry leader focusing on organizational excellence through principles such as Safety, Service and Quality. We strive to be the “Best Place to Build” through serving our employees, shareholders and community.

LPR was founded by three entrepreneurs in 1979, primarily as a local steel erector in the Rocky Mountain area. With the goal to provide a quality product and service to our customers at a competitive price, LPR established itself as a premier steel erector throughout the United States. Since 2005, LPR has expanded their offerings to include Industrial Construction Services and Plant Services to meet their customers’ growing needs nationwide.

### **Industry Focus Areas:**

- Commercial & Industrial Steel Erection
- Industrial Construction Services
- Plant Services

Rocky Turner, one of three founding members, began transitioning LPR to the next generation of leaders when his son, Linc Turner, took over as President of LPR in 2013. Rocky continues to provide guidance as CEO of LPR. LPR has a diverse workforce consisting of employees who have been with LPR from the beginning to new folks with varied degrees of expertise and knowledge that contribute to LPR’s leadership and project success.

### **What You Will Do:**

Estimators work on construction projects to predict the cost of the project. An estimator breaks down a project into its individual components, like the cost of the materials or the labor, and creates an overall estimate for how much a project will cost. An estimator apprentice will conduct research on the cost of materials, subcontractor service costs, and labor costs. An estimator may help other teams create a project proposal, seek to understand a customer's needs, track project costs, create a budget, or analyze a completed project's costs.

- Learn to read, interpret, and explain construction drawings
- Review project plans to collect information and quantify what physical materials are needed to assemble the project
- Work with other departments like Engineering and HR to gather information that will be used in the bid like current wage rates, estimated living costs and material needs
- Present cost estimates to manager or other colleagues
- Prepare reports detailing all costs going into a project
