Hello Parents,

We are happy to share some exciting news. The FDA has recently approved the Pfizer vaccine to be administered to adolescents ages 12+. We are now hosting clinics at each of the high schools in your district to help provide this vaccination to this age group. Anyone 12 years and older can receive this vaccine. Please see the following information link for further information: https://www.cdc.gov/vaccines/parents/index.html. Additional details are also included in the attached Emergency Use Authorization document.

These clinics will start next week Monday May 17th and go through Friday May 21st from 4:30 PM to 7:00 PM according to the schedule below. The links to schedule an appointment are also included. If you would like to schedule an appointment, please click on the applicable link below.

As a reminder, Pfizer is a two-dose series separated by three weeks. We will be coming back for the second shot clinic three weeks after the first shot. Once you sign up for your first shot you will receive a notification email or text to remind you of your appointment date and time, usually 24 hours prior to your first shot. After you receive your first shot you will go back into this notification to schedule your second shot. Every person who receives an immunization will also receive a 10% grocery coupon that can be used at any Safeway in Colorado.
